Not A Day In Bed.

Grambling, S. C.—In a letter from Grambling, Mrs. Lula Walden, says: 'I was so weak before I began taking Cardui, that it tired me to walk just a little. Since taking it, I do all the housework for my family of nine, and have not been in bed a day. Cardui is the greatest remedy for women, on earth.' Weak women need Cardui. It is the ideal women's tonic, because it is especially adapted for women's needs. It relieves backache, headache, dragging feelings, and other female misery. Try Cardui. A few doses will show you what it can do for you. It may be just what you want.

SPECIAL TO WOMEN

The most economical, cleansing and germicidal of all antiseptics is

Paxtine

A soluble Antiseptic Powder to be dissolved in water as needed.

As a medicinal antiseptic for douches in treating catarrh, inflammation or ulceration of nose, throat, and that caused by feminine ill it has no equal. For ten years the Lydia E. Pinkham Medicine Co. has recommended Paxtine in their private correspondence with women, which proves its superiority. Women who have been cured say it is "worth its weight in gold." At drugists. 50c. large box, or by mail. The Paxton Toilet Co., Boston, Mass.

LIKE THE "DUMDUM"

Sharp-Pointed Bullet May Make Fearful Wound.

Range at Which Projectile Is Fired and Age of the Man Hit Are Factors in Amount of Damage Done.

American army surgeons are convinced that under normal conditions all modern bullets are more humane than those formerly used, in spite of the fact that they travel at higher speed and have a far wider range. They are so sharp pointed that when they strike the soft tissues alone they make clean-cut, narrow wounds which heal very quickly.

When, however, they take a side-wise twist, or develop irregular, jagged edges through previously striking or glancing off some hard object, they have an explosive effect which produces just such terrible wounds as the "dumdum." These effects are most liable to occur in vital organs inclosed in resisting bony walls, like the brain or heart, and are nearly always fatal.

The range at which bullets are fired and the ages of the men they hit have been found to have a marked influence

The Diagram Shows How the Base of a Bullet Spins Like a Top in a Constantly Increasing Circumference. This is Why It Often Strikes Side-wise and Mutilates Like a Dumdum.

on the character of the wounds they make.

The bones of younger men usually have a great amount of animal matter, consequently are less brittle than those of older men. The less resistance met by the bullet in the comparatively softer bones, at short ranges, permits the passage of the bullet without explosive effect. In the case of the older and more brittle bones the bullet at long ranges causes great damage, especially as the bullet at these long ranges has become unsteady from loss of velocity and strikes the bone sideways, thus transferring its energy over a greater area than if it had struck point on.

Owing to the change in the position of bullets fired at long ranges, the effect produced in the bony tissues is at first in the short ranges very severe from the high velocity, but in the midranges the effects are less severe because of loss in velocity, and at long ranges the effects become severe again because of the impact being made with the side of the bullet.

Bad Taste as Seen in Japan.

Rector Aston, the scholarly Japanese secretary to the British legation in Tokyo, summarized what Kenko, the fourteenth century writer of "Tsurezure Gusa," considered to be "bad taste," thus:

Too much furniture in one's living room.
Too many pens in a stand.
Too many Buddhas in a private shrine.
Too many rocks, trees and herbs in a garden.
Too many children in a house.
Too many words when men meet.
Too many books in a bookcase there can never be, nor too much litter in a dust heap.—London Saturday Review.

Parasite Destroys San Jose Scale.

A parasite which destroys the dreaded San Jose scale has been discovered, and is now being used in Pennsylvania, where it has been highly successful in combating the ravages of the pest which has done such damage to American fruit and nut trees. The parasite is the Chalcid fly, which comes from the same part of China from which the San Jose scale first came. There the Chalcid fly has effectively checked the scale.

Patterns by Kaleidoscope.

Doctor Pulfrich, one of the experts of the Carl Zeiss Optical company in Germany, has constructed a kaleidoscope on scientific principles and of mathematical accuracy. Its use is for making kaleidoscopic patterns for textiles, linoleums, decorations, etc., some of those it has produced being of extraordinary beauty. He calls it the photokaleidograph, because it is part of a camera that photographs the patterns it forms.

Spreading Tuberculosis Infection.

Dr. Guy Hinsdale of Hot Springs, Va., points out that it is not the expired air of consumptives that carries infection, but the sputum and tiny drops of moisture coughed up by the patient that carry the bacilli and communicate the disease to others.

Sacred Cattle Turned Into Beef.

The sacred cattle of Madagascar, where these animals roam in immense herds, are being slaughtered and shipped to Paris to help out the scarcity of beef.

The Home Group

A carefully selected list of leading periodicals especially prepared for the readers of the HOPKINSVILLE KENTUCKIAN.
